

In 1896 when John Hill founded the Hill and Griffith Company, the concept of quality was adopted. He stated, "Hill and Griffith feels that the integrity of the company must be represented in the products and services bearing our names and labels."

Today, this tradition still lives on.

Since it was founded, The Hill and Griffith Company has been recognized for many firsts. We have remained in the forefront of environmentally friendly release agents, specialty fire resistant hydraulic fluids and metal working lubricants to the metal casting and forming industries. With ongoing investment in research and development, Hill and Griffith has achieved unparalleled leadership with the introduction of new technologies, as well as quality supplies.

Mission Statement

Our mission is to continually improve the company's products and services in a manner that will meet or exceed our customers' needs and expectations.

ENVIRONMENTAL FRIENDLY & BIODEGRADABLE PRODUCTS

Our variety of environmentally sound release agents, coatings, partings, fire resistant hydraulic fluid, lubricants, glues and specialty products will meet your metal casting's demanding needs.

Hill and Griffith has created a family of green sand products including core glues that are all designed with an eye toward the future. Technological advancements, mineral resources and environmental concerns are constantly being researched and developed in the process of offering products that will help the foundries of the future survive and prosper.

Y-250

CORE PASTES:

GreenHornet
Red Chief
Shurstik 306

MUDDING COMPOUNDS:

Pyroseal Classic-Non Graphite
Ebony Classic
Slick Seal P-20G

AIRSET RELEASE AGENTS:

Airset 95
Airset 97
Airset 913

COAGULANTS:

Slagone
Slag Fine
Slag Kleen
Slag Set

COLD BOX RELEASES:

Cobra™15N
Cobra™212
Cobra™521

BLACKING PRODUCTS:

Plumbago #118
Imperial Blacking

HYDRAULIC FLUIDS:

Bio-Syn™ FM Approved
Water Glycol FM Approved
Slideway
Gear
AW

CORE BINDERS:

523 Emulsified Binder
683 Emulsified Binder
Corosil Sodium Silicate Binder
CoBond 86 Sodium Silicate
Binder Goulac

CORE OILS:

840 Solventless
841 Solvent

DRY PARTINGS:

Avon
Micro Part
Non-Sil
#12

MOLD SEALANTS:

Mold Seal
Multiple formulating with broad variety of water, alcohol and minerals

POT, LADLE & TOOL COATINGS:

Tool Kote
Pot & Ladle
Glook™

SHELL CORE RELEASE:

RESIN SANDS

CATALYSTS

RISER SLEEVES
